

APPLICATION OF PESTICIDES

The Governing Board follows the standards for the safe application of pesticides in the classroom buildings of the School as established by the Ohio Department of Agriculture.

The Board designates the Building Administrator to serve as the contact person for any pesticide application in classroom buildings of the School. The contact person maintains the necessary documentation for:

- (1) Each application of pesticide(s) in a classroom building for a period of one year following the date of application; and
- (2) The notification provided to individuals who requested prior notice of pesticide application according to the Notice Procedure.

Notice Procedure

Any parent(s) or guardian(s) of a minor student, any adult students, and all faculty and staff members may request and receive prior notice of scheduled pesticide applications by e-mail.

The School shall provide notice to individuals who have requested prior notice and provided their necessary contact information at least five (5) days in advance of a scheduled application of a pesticide. If special circumstances (for example, a health threat that requires immediate application) prevent notice from being provided in advance of the application, the School shall provide notice of the application as soon as possible, including the reason why advance notice could not be provided.

This notice procedure does not apply to the application of disinfectants, sanitizers, germicides, or anti-microbial agents.
